

Dr Reinhard Müller-Siebert

R&D-Coach • Technical Interim-Manager • Hands-on Physicist

As a technical interim manager, I support your research and development in the long term. With my good technical instinct and my broad knowledge, I open new paths for your developments. I know what the relevant tasks are to meet your requirements.

My communication works because I understand the language of the people in your development department.

For the success of your developments, I also work operationally and like to lend a hand myself.

Personal Data

24. November 1968
