

Project description

Cost reduction for high voltage device

Two patents should then be analysed to determine whether they restrict the customer's business.

I have clarified whether the procedures proposed in the patent are interesting for the customer and how the patents could possibly be circumvented.

Objectives and key figures

- ✓ Figure out that patents are not limiting
- ✓ Same function proposed with less effort

February 2019 – July 2019

Budget 3'000 CHF

Individual work

Plastic and metal industries

Testimonial

"The commissioned patent analysis was processed very competently, and the deadline was met perfectly."

Jürgen Kress, Head of Product Development
