

## Project description

### Patent analysis to clarify possible restrictions

Two patents were to be analysed in terms of restricting my client's business – freedom to operate (FTO).

I clarified whether the procedures proposed in the patent were of interest to my client, and how the patents could be circumvented if necessary.

### Targets and key figures

- ✓ Non-limitation of patents established
- ✓ Same function with less effort proposed

February - July 2019

Budget CHF 3,000

Independent project work

Plastics and metal industry

### Testimonial

«The commissioned patent analysis was handled very competently and the deadline was met perfectly.»

Jürgen Kress, Head of Product Development
